How to Add The IP60 in Darkroom Booth

The IP60 currently is not a listed printer in Darkroom, so to add to your printers you will need to manually add as a Windows printer.

Once you launch Darkroom, open the Global Settings menu and go to Printer options. Choose add printer in the upper right corner.

In the add printer dialog, scroll down the list and find Windows Printer at the end.

Choose the IP60 from the list of available printers

N			Charlen and Charle	Madal	
Name			Status	Model	
PTI_Cold	or_Photo_IP60 o	n ptserver	Ready	IP60 Photo	
Color Lab	pel 2000		Ready	Color Label 2000	
Color Lab	pel 2000 (Netwo	rk)	Ready	Color Label 2000	
Color Lab	pel 500		Ready	Color Label 500	
Color Lab	pel 910		Ready	Color Label 910	
Fax			Ready	Microsoft Shared Fax Driver	
IP60 Pho	oto		Ready	IP60 Photo	
Microsoft	Print to PDF		Ready	Microsoft Print To PDF	
Microsoft	t XPS Document	Writer	Ready	Microsoft XPS Document Writer v4	
			OK	Court	
_			UK	Cancel	_
	SONY	Sony UP-DR200		Roll	

Once you click ok to add, you'll see the printer dialog. Change the resolution from 300 to 600 DPI since the IP60 supports a higher DPI than dye sub printers. You can leave the page settings options alone at the bottom.

otal Wi	indows Printe	er (IP60 Photo)		? ×
	Printer Settin Name: Status: Type: Where:	gs IP60 Photo Ready IP60 Photo USB004		Properties Advanced
	Comment: Resolution: Page Setting Page Size: Arrangements	600 ~ s 4x6 ~ s Allowed: 4x6	dots per inch Arrangements	Allow Multiple-Page Documents
	Network		Enable driver	OK Cancel

Click the properties if you want to adjust any of the current page size, color matching or saturation options. Otherwise click ok when done and you'll see the IP60 as an available printer.
