How to setup and print single 2x6 photo strips in Photoboof 7

First, open up your Windows printers and open the Printing Preferences for the IP60. Choose 6x2 for your paper size and adjust any other settings.

Launch Photoboof 7. In the main application choose File and Layout Editor

Choose the paper size dropdown and choose 2x6 – Horizontal for your page size. Edit your template as you want and save it. In this example I saved as "Single 2x6"

Under the File menu of the main application choose Preferences. Under the Layout Settings tab choose the 2x6 layout you created for the single 2x6 strip
