## How to setup and print single 2x6 photo strips in Snappic

Single strip printing requires Photo Booth Print Server v1.2.2 or greater.

When you launch Photo Booth Print Server, select the IP60 as your printer and check the Transpose Orientation button.

Standard Config:	Configured Edit				
Margins:	Top:         0         "         Left:         0         "           Bottom:         0         "         Right:         0         "				
Troubleshooting	Check For Update				
Wired connections will only work if iTunes is installed. Please install iTunes to use wired connections. <u>Install iTunes.</u>					

First set up Standard Config by clicking the edit button for Standard. Here select 6x4 and Portrait orientation on the IP60. Select your quality settings as you want.
